UNIQUE WHOLE HOME AND MESH WI-FI CAPABILITIES

Wi-Fi is a core essential of the modern home. Keenetic routers deliver reliable, continuous and secure Wi-Fi throughout your home. Starting from one main Keenetic router, as your demand grows, you can add Keenetics as Wi-Fi extenders to grow from a single node system to a centrally managed multi-node Whole-Home Wi-Fi System. Wi-Fi System configuration can be optimized depending on your personal performance and usage requirements through leveraging existing Ethernet wiring to connect extenders or using wireless Mesh connections. The multi-node Keenetic Wi-Fi System will ensure seamless roaming throughout your home regardless of its structure and dimensions.

CONTINUOUS RELIABLE INTERNET

Your Keenetic gives you the freedom to use more than one ISP regardless of the connection types and service packages you have signed up for. A real stand out feature of your Keenetic is the capacity to connect easily to multiple ISPs simultaneously for failover and load balancing using Built-in 4G, Fast Ethernet and Wi-Fi links. If you experience a break in service from an ISP, your Keenetic router will automatically and seamlessly switch to a different working ISP so your smart home will stay smart 24/7.

DETACHABLE EXTERNAL 4G ANTENNAS

With bundled external high-gain 4G antennas, Keenetic offers fast mobile internet access, and in case of long distances from the base station, or difficult terrain, you can connect a MIMO directional outdoor antenna (purchased separately) via the durable, low-loss SMA connectors.

ROBUST CYBERTHREAT PROTECTION

Your Keenetic comes with security options preconfigured for safe operation in the home, right out of the box. Like no other home router Keenetic deploys bank-grade digital HTTPS certificates to secure device management sessions, offers network segmentation to isolate and guard the traffic of smart home IoT gadgets, and performs fully automatic regular software updates to maintain constant market-leading levels of security, reliability, performance.

SMART HOME AND IOT-READY

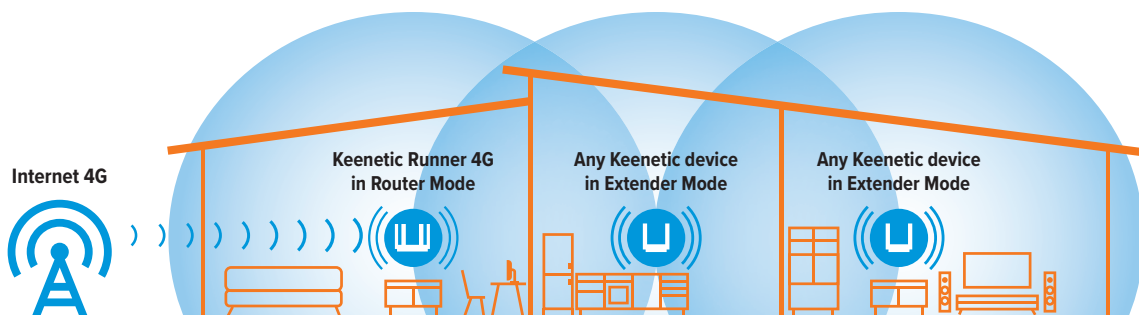

Keenetic Mesh Wi-Fi Routers' superb coverage, uninterrupted connections and enhanced security make them ready for tomorrow's fully-connected home and business environments. Connected devices suffer virus and other criminal attacks — Keenetic routers have advanced Network Segmentation and Cloud-based cyberthreat protection to stop infection and prevent Spyware on any device in your Keenetic network. Using the IntelliQoS application prioritization feature, Keenetic users can prioritize, throttle or block individual applications to ensure bufferless streaming and fast, lag-free, gaming, and be confident that their work from home experience will be uninterrupted.

PARENTAL CONTROL TOOLS

Keenetic has cloud-based Content Filtering and Ad Blocking options from AdGuard, CleanBrowsing, Cloudflare, Neustar, NextDNS, OpenDNS, Quaud9 and SafeDNS. Undesirable images or information, time-stealing games, and social media as well as aggressive round the clock marketing can all be managed and kept out of your family life. Each member of your family has an individual content filtering profile and scheduling function – only allowing Internet access when you choose. With one click, you can control your children's Internet usage.

FRIENDLY, EASY TO USE APP

By pairing your Keenetic device to the Keenetic App, you can manage your multi-node Mesh Wi-Fi System, including multiple locations, from anywhere in the world. Within minutes, you can control home networks, see connected and registered devices, and enable securely isolated Wi-Fi for your guests. Setting up weekly schedules for members of your family, monitoring their Internet activity, managing content restrictions or pausing the Internet from the palm of your hand could not be simpler.
